### Splicing Cleaning bundle

MCC-WFW CleanWipes™ 90

MCC-POC03M Fiber Optics Splicing & Connector Cleaner

*Great bundle to clean Fiber before splicing.*

Sticklers™ CleanWipes™ 90 Benchtop Wipes are high quality, optical-grade, lint-free fiber optic wipes designed for cleaning fiber before splicing. They're made of fabric (not paper!) which means they don't put lint, cellulose or glues(from paper's binder) on your fiber end faces. They are exactly the right size and the right material to work with the Cleaning Fluid to make "wet-dry" cleaning simple and cost-effective.

### Connector Termination Cleaning Bundle

MCC-WCS100 CleanWipes™ 600

MCC-POC03M Fiber Optics Splicing & Connector Cleaner

*Great bundle to Clean Fiber connector after termination job.*

Sticklers™ CleanWipes™ 600 are high-quality optical grade wipes engineered for cleaning fiber prior to splicing, or for cleaning fiber optic jumpers and connector plugs. These wipes make cleaning SC and LC duplex connectors fast, reliable and affordable. Use together with the cleaning fluid to remove any hard dirt on the connector end face.
